End clamps are used when top-mounting modules to the top slot of both our Standard (XRS) and Light (XRL) Rails (these end clamps fit both rail types). These clamps are not dependent upon the module's mounting holes. IronRidge End Clamps require 1.5" of rail on each end and vary in height depending on the module being mounted. Please use the sizing chart on the next page (Page 12) to determine the right part for your project. Also available in black anodized finish. Black is special order, call for additional details.
